Discreet 12 volt filter & pump keeps water clear.

3 Glass Aquarium
5 gallon frameless tank includes glass top.

Energy efficient, safe, low voltage.

#4005 Qty: 1
Made in China

Keep it Simple

Setting things up

What else you'll need:
Substrate - sand or gravel
Decor - a few rocks and pebbles
Water - purified or dechlorinated
Fish food - 2 oz. will last months!

Do keep

Tetras
Guppies
Corydoras
Zebrafish
Betta fish (just one!)

Don't keep Goldfish, Cichlids & Gouramis

Once per day - feed your fish, just a pinch.

Once per week

- Remove about 10% (64 oz.) of tank water and replace it with purified water. Wipe the inside glass and filter with a clean cloth. Rinse sponge in filter with water.

Do not use cleaning agents (soap or window cleaner) on or around the aquarium.

Above all - don't make it complicated and enjoy your aquarium.

Simplicity All-In-One

Inspiration

The **EcoPico™** - an elegant glass cube that's truly inspirational, simple to set up and maintain.

We've all wanted an aquarium, but the same thoughts cross our minds – they are a chore to clean, they don't match the décor and everything looks cheap. We went back to basics - emphasizing minimalism and simplicity.

Unpack

Setting Up

1. Place on flat surface
2. Remove contents:

- LED Arm (1)
- Transformer (1)
- Filter (1)
- Glass top (1)
- Plastic clips (4)

Aquascape

Select aquascape material

- Gravel
- Accent Rocks
- Plants

Pour in clean gravel & spread out.

Place accent rocks & plants.

Fill

Pour in purified water. Place filter in the back middle or corner. Secure filter in place with magnet.

Finish

Install the glass top with the four plastic clips. Install LED Arm on the rim of the aquarium.

Plug light and pump into a power outlet.

Water should be clear in a day.
